

Sample Health Insurance Policy - ClaimWise Demo

Section 1: Definitions

"Medically Necessary" means a service or supply required to diagnose or treat an illness, injury, condition, or symptoms in accordance with generally accepted standards of medical practice.

"Prior Authorization" means advance approval from us that a service, procedure, or prescription meets policy requirements for coverage before it is performed or filled.

"Pre-existing Condition" means any illness, injury, or condition for which the policyholder received diagnosis, treatment, or medical advice prior to the policy's effective date.

Section 2: Covered Services

This policy covers Medically Necessary services including: physician office visits; emergency room and urgent care visits; hospitalization; diagnostic imaging and laboratory testing; prescription medications listed on the covered formulary; outpatient surgery; and mental health and substance use treatment at parity with medical/surgical benefits.

Emergency room visits are covered under the prudent layperson standard: coverage applies whenever a reasonable person could have believed that symptoms constituted an emergency, regardless of the final diagnosis.

Section 3: Exclusions

This policy does NOT cover: (a) cosmetic or elective procedures not related to a Medically Necessary diagnosis, including elective cosmetic surgery such as rhinoplasty performed for appearance rather than functional/medical reasons; (b) experimental or investigational treatments not approved by the relevant regulatory body; (c) services received without required Prior Authorization, except in a documented emergency; (d) treatment for a Pre-existing Condition during the applicable waiting period defined in Section 4; (e) services rendered by an out-of-network provider without prior approval, except in an emergency.

3.1 Cosmetic Procedure Exclusion: Procedures performed primarily to improve appearance rather than to restore bodily function or treat a diagnosed medical condition are excluded from coverage, regardless of provider recommendation.

Section 4: Pre-existing Condition Waiting Period

Claims related to a Pre-existing Condition are excluded from coverage for the first 90 days following the policy's effective date. After the waiting period has elapsed, treatment for the condition becomes eligible for coverage subject to all other policy terms.

Section 5: Prior Authorization Requirements

The following services require Prior Authorization before being performed: non-emergency diagnostic imaging (MRI, CT scan, PET scan); elective inpatient admissions; certain specialty prescription medications; and out-of-network referrals. Claims for these services submitted without a valid Prior Authorization on file may be denied, though policyholders may request retroactive authorization with supporting medical documentation.

Section 6: Required Documentation for Claims

To process a claim, the policyholder must submit: (1) an itemized bill or superbill from the treating provider; (2) proof of payment if reimbursement is being requested; (3) applicable Prior Authorization confirmation number, if required; and (4) a physician's note or referral for specialist or diagnostic services.

Section 7: Claims Process

Upon receiving a completed claim submission, a claims examiner will review the documentation against the covered services and exclusions listed in this policy and will issue a coverage determination within 30 calendar days. This determination is preliminary and subject to further review by a licensed claims adjuster or medical director before final payment or denial is issued.

Section 8: Deductibles and Copays

The annual deductible, copay amounts per service type, and out-of-pocket maximum are shown on the Declarations Page and apply before or alongside coverage as indicated.
